Indiba Facial - Bonus 6	600 €	
Indiba Facial - Bonus 10	1000 €	

INDIBA is a treatment that treats facial, body, hair, sports or postoperative tissues with high frequency technology. The body itself is what produces heat, with all the physiological effects that this entails and all its benefits. Ideal for treating sagging skin (lifting effect), since the skin retracts back and we can see more tension, combat cellulite and even provide hydration thanks to collagen.
